Applied Acoustics

Papers Published in 1987

CONTENTS OF VOLUME 20

Number 1

Editorial 1

Acoustic Characterisation of an Impact Forming Machine 3
S. Vajpayee (Canada)

A Simple Method for Predicting Kerbside L_{10} Level from a Free Multi-type Vehicular Flow 15
Wu Shuoxian (China)

Urban Noise Surveys 23
A. L. Brown (Australia) and K. C. Lam (Hong Kong)

Vibrations of Bells 41
Thomas D. Rossing (USA) and Robert Perrin (UK)

Calculation of L_{Aeq} and *SEEL* for Sound Level Patterns with Constant Slopes . 71
K. M. Letherman (UK)

Book Review 77

Calendar 79

Number 2

Levels of Ambient Noise in Hong Kong 85
A. L. Brown and K. C. Lam (Australia)

Intrusive Sounds 101
Anna Preis (Poland)

Learning English Basic Sounds through Syllabic Utterances 129
J. S. Mirza (Singapore)

A Comparison of Modal Density Measurement Techniques 137
P. R. Keswick and M. P. Norton (Australia)

Technical Note
Critical Velocity of Flexible Shafts with Concentrated Masses and Intermediate Supports 155
Patricio A. A. Laura, Bernardo J. Feliu and Pablo J. Antonelli (Argentina)

Calendar 161

Number 3

Accurate Measurement of the Transmission Coefficient of Constricted Pipes . 163
S. H. Tang and H. S. Tan (Singapore)

The Return Wall as a Traffic Noise Barrier 169
M. M. Radwan and D. J. Oldham (Great Britain)

The Acoustic Performance of Building Façades in Hot Climates: Part III—Conventional Screens 183
R. N. S. Hammad and B. M. Gibbs (Great Britain)

A Critical Survey of Basic Theories Used in Muffler Design and Analysis . . 195
A. I. El-Sharkawy and N. M. El-Chazly (Egypt)

Exploiting the Laboratory Measurement of Sound Transmission Loss by the Sound Intensity Technique 219
A. de Mey and R. W. Guy (Canada)

Conference Report 237

Calendar 242

Number 4

Prediction of Verbal Communication in Noise—A Development of Generalized SIL Curves and the Quality of Communication (Part 2) 245
H. Lazarus (Federal Republic of Germany)

Industrial Impulse Noise: Crest Factor as an Additional Parameter in Exposure Measurements 263
Jukka Starck and Jussi Pekkarinen (Finland)

New Functional Evaluation Methods of Sound Insulation System Using the SEA Method and an L_x Evaluation Criterion 275
Mitsuo Ohta and Shin'ya Kuwahara (Japan)

Effect of Associated Walls on the Sound Insulation of Concrete Party Floors . 297
E. C. Sewell and J. E. Savage (Great Britain)

Letter to the Editor 317

Calendar 320

CONTENTS OF VOLUME 21

Number 1

Measurement of Low Frequency Absorption 1
W. A. Davern (Australia)

Vibrating Rectangular Plate with a Free Edge: The Effect of a Concentrated Mass and an Internal Support 13
Patricio A. A. Laura and Liberto Ercoli (Argentina)

A Note on the Determination of Cutoff Frequencies of Hollow Waveguides by a Contour Line–Conformal Mapping Technique 23
J. Mazumdar and D. Hill (Australia)

Reduction of Noise Nuisance Caused by Banging Doors 39
L. C. Fothergill and J. E. Savage (Great Britain)

Development of a Rating Procedure for Impact Noise Transmission through Walls 53
S. J. Bowles and E. Gold (Australia)

Letter to the Editors 75

Calendar 77

Number 2

Guest Editorial 79
David C. Hothersall

Impact of Transportation Noise in Some New Industrial Countries . . . 81
G. J. McNulty (Saudi Arabia)

Response to Changes in Noise Exposure: Testing a Model 89
I. D. Griffiths and G. J. Raw (Great Britain)

Road Traffic Noise—The Influence of the Road Surface and its Characterization 97
Ulf Sandberg (Sweden)

Low Noise Road Surfaces 119
P. M. Nelson and P. G. Abbott (Great Britain)

Accuracy of *Calculation of Road Traffic Noise* 139
R. A. Hood (Great Britain)

A Computer Model to Assess and Predict Road Transport Noise in Built-up Areas 147
Kadhim S. Jraiw (Great Britain)

The Prediction of Noise from Urban Traffic Under Interrupted Flow Conditions 163
M. M. Radwan and D. J. Oldham (Great Britain)

Calendar 187

Number 3

A Note on Flexural Vibrations of a Pipeline Containing Flowing Fluid . . 191
P. A. A. Laura, G. M. Ficcadenti de Iglesias
and P. L. Verniere de Irassar (Argentina)

Assisting the Assisted Resonance at the Central Hall, York, UK 199
J. G. Charles, J. Miller and H. Gwatkin (Great Britain)

Additional Results of Transverse Vibrations of Polar Orthotropic Circular Plates Carrying Concentrated Masses 225
R. O. Grossi and P. A. A. Laura (Argentina)

Acoustical Properties of Coal 235
C. H. Chew (Singapore)

In-plane Vibrations of an Arch of Variable Cross Section Elastically Restrained Against Rotation at One End and Carrying a Concentrated Mass at the Other . 241
C. P. Filipich, P. A. A. Laura and V. H. Cortinez (Argentina)

Technical Note
The Effect on Sound Insulation of Small Holes Through Solid Masonry Walls . 247
L. C. Fothergill and R. S. Alphey (Great Britain)

Book Reviews 253

Calendar 255

Number 4

Whirling of Flexible Shafts with Intermediate Supports 259
P. A. A. Laura, S. La Malfa, L. Ercoli and V. H. Cortínez (Argentina)

Hearing Protection and Warning Sounds in Industry—A Review . . . 267
P. Wilkins and A. M. Martin (Great Britain)

Sound Attenuation of Earmuffs under Conditions of Impulsive Noise—Laboratory Measurements 295
F. B. Shenoda (Egypt), H. Ising and R. Fischer (West Germany)

Measurements and Analysis of the Traffic Noise in Amman, Jordan and its Effects 309
R. N. S. Hammad and M. K. Abdelazeez (Jordan)

Calendar 321

CONTENTS OF VOLUME 22

Number 1

Vibration and Stability of an Orthotropic Plate 1
Ji-Liang Doong and Tsyr-Jang Chen (Republic of China)

SEL for Electrically Hauled Trains 15
H. Estellés, F. Belmar, E. Gaja and P. Solana (Spain)

Selection of Hearing Protectors 25
A. Behar and R. A. Jackson (Canada)

The Reduction of Blast Overpressures from Aqueous Foam in a Rigid Confinement 35
R. Raspet, P. B. Butler and F. Jahani (USA)

Measurement of Coupling Loss Factors by Matrix Fitting: An Investigation of Numerical Procedures 47
C. H. Hodges, P. Nash and J. Woodhouse (UK)

Technical Note

Computer Simulation of Road Traffic Noise in an Urban Built-up Area . . 71
Wu Shuoxian (People's Republic of China)

Calendar 79

Number 2

A Short Method for the Determination of Airborne Sound Insulation Characteristics in Buildings 83
E. Cirillo (Italy)

Sound Absorption by Conical Absorbers and Glasswool Layer Combination . 91
V. Mohanan, O. Sharma and A. F. Chhapgar (India)

A Prediction Method of the Response Probability Distribution for Arbitrary Sound Insulation Systems 103
N. Nakasako, M. Ohta and S. Kuwahara (Japan)

Charts for Acoustic Design of Rooms Exposed to Outdoor and Indoor Noise . 117
G. Rosenhouse (Israel)

A Lower Bound for the Smallest Frequency Determined by Means of the Rayleigh–Ritz Method. 131
C. P. Filipich (Argentina)

Über die gewünschte Hörerlautstärke bei Kammermusik 145
Günther Hartmann (FRG)

Book Reviews 155

Calendar 161

Number 3

The Noise Reduction of Flanking Paths 163
R. J. M. Craik (Great Britain)

Investigations into the Transduction Properties of Dynamic Microphone Membranes Subjected to Transients 177
M. Niewiarowicz (Poland)

An Expert Systems Approach to Transducer Selection and Deployment . . 185
J. P. Ignizio, K. W. Wiemann and W. J. Hughes (USA)

A Method for Estimating the Sound Power Radiated from Plates with Prescribed Excitation in the Multi-mode Region 203
M. Åbom and H. Bodén (Sweden)

On the Formulation of the Intensity Method for Determining Sound Reduction Indices 213
B. G. van Zyl, P. J. Erasmus and F. Anderson (Republic of South Africa)

Technical Note
Experimental and Numerical Values of the Fundamental Frequency of a Lamp-Pole Type System 229
P. A. A. Laura, J. L. Pombo and V. H. Cortínez (Argentina)

Letter to the Editors 235

Calendar 239

Number 4

The Effect of Material Properties on Reducing Intermediate Blast Noise . . 243
R. Raspet, P. B. Butler and F. Jahani (USA)

In-Plane Vibrations of a Circumferential Arch Elastically Restrained against Rotation at One End and with an Intermediate Support 261
C. P. Filipich, R. Carnicer, V. H. Cortínez and P. A. A. Laura (Argentina)

An Exploratory Study of Community Noise Levels in Mexico City . . . 271
R. R. Boullosa and S. J. Perez Ruiz (Mexico)

The Sound Transmission Loss of a Single Panel Measured with the Two-Microphone and the Conventional Method—Comparison with the Statistical Energy Analysis Model 281
M. Minten, A. Cops and F. Wijnants (Belgium)

A Method for the Location of Sparks in Electrostatic Precipitators . . . 297
R. G. Corbin (Great Britain)

Calendar 319
